

Customers

The Customers module has been developed using the renowned Excelerator® Technology. This technology allows the bidirectional, seamless integration of Excel and Sage.

By a click of the mouse, Customer records created or amended in Excel update the Sage database with full control and validation that follow the Sage business rules.

The powerful and flexible browse feature allows the user to search the Sage database for valid customer codes and other data whilst working in Excel.

This is done by a simple right click of the mouse on the field to be looked up. The search can be based on a number of fields and can also be used to create conditional criteria for the search. Fast, efficient, simple to use and covers a broad range of business modules, what more could you ask for, Excelerator it's a must have!

Richard Clark, Delta Impact

Customers

An easy-to-use Spreadsheet Designer is provided to create user-defined spreadsheet formats for data entry and upload to Sage. This can be used as an organisation's standard Customer entry form.

The Spreadsheet designer is also used to create customer details from existing spreadsheets in an ad-hoc manner or from data from other systems.

A very useful feature of the software is the ability to carry out mass inserts and mass updates of specified Customer records such as price list code, analysis codes and territory code. CustomersExcelerator® isconsidered to be the interactiveCustomerCreationMaintenance software.
