The powerful and flexible browse feature allows the user to search the Sage database for valid product codes and other data whilst working in Excel.

This is done by a simple right click of the mouse on the field to be looked up. The search can be based on a number of fields and can also be used to create conditional criteria for the search.

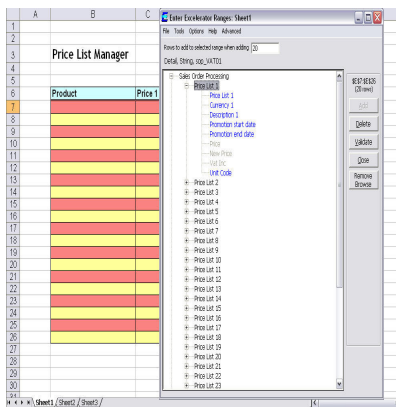

By a click of the mouse, Price Lists created in Excel update the Sage database with full control and validation that follow the Sage business rules.

“Excelerator has increased our productivity significantly and as a result we have rolled out the software to our sites throughout the UK.”

# Price List Manager

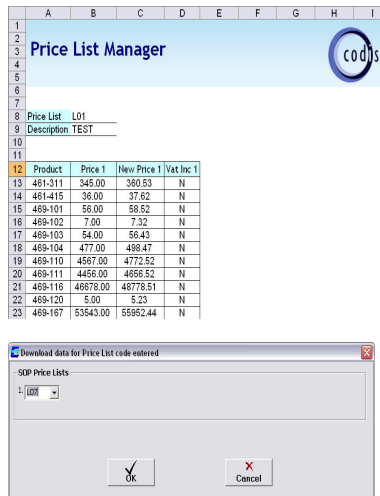

An easy-to-use Spreadsheet Designer is provided to create user-defined spreadsheet formats for data entry and upload to Sage. This can be used as an organisation's standard Price List form.

The Spreadsheet designer is also used to create price lists from existing spreadsheets in an ad-hoc manner.

A very useful feature of the software is the ability to retrieve price lists to the spreadsheet for review, re-entry or to create a new price lists.

Price List Manager Excelerator® is considered by accountants to be the interactive price list creation and maintenance software.

The tool that has made significant reductions in processing times and has provided time for value added analysis and evaluation that just was not possible prior to the introduction of the software.

## Key Features
