By a click of the mouse, suppliers details created in Excel update the Sage database with full control and validation that follow the Sage business rules.

The powerful and flexible browse feature allows the user to search the Sage database for valid supplier codes and other data whilst working in Excel.

This is done by a simple right click of the mouse on the field to be looked up. The search can be based on a number of fields and can also be used to create conditional criteria for the search. Excelerator has cut our Month end reporting time from seven days to five within the first month of implementation.

Brian May, Bunzl PLC

## **Supplier Information**

An easy-to-use Spreadsheet Designer is provided to create user-defined spreadsheet formats for data entry and upload to Sage. This can be used as an organisation's standard supplier information form.

The Spreadsheet designer is also used to create suppliers details from existing spreadsheets in an ad-hoc manner.

A very useful feature of the software is the ability to retrieve supplier information to the spreadsheet for review, re-entry or to create additional supplier information for updating to Sage. TheSupplierInformationExcelerator®moduleisconsidered by accountants to betheinteractiveSupplierInformation creation software.

The tool that has made significant reductions in processing has times and provided time for value added analysis and evaluation that just was not possible prior to the introduction of the software.

## Key Features

- Upload and
   download POP
   Supplier Information
- Create Supplier Information records
- Amend existing
   Supplier Information
   records
- Browse directly onto Sage data
